GemTone Stain

Penetrating, translucent color treatment for interior concrete floors

Consolideck® GemTone Stain, LS® and LSGuard® create a low-maintenance, high performance floor at a Starbucks in Springfield, Missouri.

Perfect for polished concrete

Perfect for polished concrete, Consolideck® GemTone Stain transforms dull grey concrete into decorative, low-maintenance finished concrete flooring.

Safe, water-based

This non-flammable, water-reducible formulation penetrates and colors cementitious surfaces without risk of etching the surface or corroding nearby architectural metals.

Unlimited colors

Use GemTone Stains alone or in layers over grey, integrally colored, acid-stained or color-hardened concrete for an unlimited range of colors.

Simple to use

GemTone Stains are liquid concentrates in pre-measured 12-oz packages. Simply adding one package to one gallon of fresh water makes a vibrant concrete stain. To apply, just spray and spread. Concentrated GemTone Stain minimizes freight, handling, storage and container disposal costs.

Apply penetrating GemTone Stains to concrete before hardening/densifying with Consolideck® LS®, then burnish on Consolideck® LSGuard® to enhance the color with a high-gloss protective finish.

- Vibrant colors turn gray concrete into colorful decorative concrete.
- Adds color & depth to diamond-polished concrete.
- Enhances integrally colored, acid stained, color hardened or concrete colored with solvent-based dyes.
- Ideal for use under Consolideck® lithium-silicate hardeners/densifiers.
- VOC Compliant. Non-Flammable. Non-Toxic. Non-corrosive. Low Odor. Suitable for use in occupied spaces.
- Contains no harmful acids. Will not etch polished concrete surfaces or corrode surrounding metals. No need to neutralize.
- Easy application and fast drying lets color be added and blended.
- Produces consistent gem-like color on any age concrete floor.
- Penetrates deeper than acid stains or conventional color pigments. Will not peel or flake.
- Standard colors may be intermixed to create an unlimited number of color variations.
- Additional coats may be applied to improve color depth, uniformity and intensity.
- Mix with water, acetone, denatured alcohol or other approved solvent carrier.

Certified to meet the nation's toughest IAQ standards

GemTone Stain is third-party certified to meet North America's strictest indoor air criteria, by Scientific Certification Systems, Emeryville, Calif.

Certified to meet the nation's toughest food safety standards

GemTone Stain is third-party certified by NSF International to meet health and safety standards for use in and around food facilities.
